

Josh Emory

Biography

Josh's litigation practice has included business, corporate, and commercial litigation, including intellectual property disputes relating to patents, trademarks, copyrights, trade secrets, and unfair competition, as well as seizure of goods by the U.S. Customs and Border Patrol Agency, employment disputes involving intellectual property, personal injury matters, conflicts of interest under California Government Code section 1090, Brown Act and California Public Records Act compliance, and defense of non-profit organizations.

In addition to litigating, Josh focuses on business and technology transactions, including transactions involving patents, trademarks, copyrights, and trade secrets, intellectual property due diligence, perfection of intellectual property chain of title rights and security interests therein, technology transfer and licensing agreements, joint venture agreements, research and development agreements, consulting agreements, manufacturing and supply agreements, non-disclosure agreements, privacy policies and agreements, website terms of service, and other types of business and commercial agreements, as well as U.S. and international patent and trademark registration and prosecution and other intellectual property and business transactional matters, including copyright registration, and formation of business entities, including corporations and LLCs.

Josh's trademark practice centers on registration, counseling, and the enforcement of trademark rights. He has prosecuted a large number of U.S. and international trademark portfolios for a diverse range of clients, in all areas of trademark law and in varied industries. His practice includes the evaluation and clearance of marks, the maintenance and monitoring of marks, licensing, recordation of trademarks with the U.S. Customs and Border Protection Agency, and the handling of opposition and cancellation proceedings.

Josh has also prosecuted a wide array of U.S. and international patent portfolios spanning diverse fields, including mechanical devices, medical devices, molecular biology, biochemistry, genetic testing, pharmaceuticals and nutraceuticals, semi-conductors, plasma fractionation processes, pyrolysis waste treatment systems, automotive parts, wireless devices, software, content delivery and other network systems, component packaging, biodegradable containers, and therapeutic sporting garments.
